

Treatment Room

The Treatment Room transforms the beauty area in an exclusive space, thanks to the harmonious combination of cutting-edge pieces of equipment for effective and ingenious body treatments. According to the dimensions, the available resources and the goals, it is possible to choose one of five different configurations for the complete wellness of body and mind.

The alternation between heat, water and rest underlies a new idea of aesthetics where beauty and functional well-being are achieved through effective treatments and cutting-edge rituals. Our Treatment Room combines products that, through the skilful manipulations of the operator, maximize the benefits of both treatments and rituals in beauty areas and centres.

The areas dedicated to beauty and self-care, designed with advanced technologies and scientifically-validated methods, broaden the frontiers of spas and beauty centres and complete the experience, making it all-embracing. Our goal is to make your facility a piece of excellence offering innovative Wellness to be experienced at any moment.

Innovation

Our number one goal is to meet the need for a better quality of life, and science is our ally. We work to create innovative and effective Wellness proposals that combine health and beauty thanks to cutting-edge equipment.

Effective programs

Beauty rituals, treatment protocols and health prevention programs become functional tools to make the most of the effectiveness of the offer and combine the aesthetic result with profound and long-lasting psycho-physical well-being.

Training courses

We place our experience at your service for the training of your employees. Our courses increase knowledge, teach the correct application of our methods of use and offer updates on the most effective management technologies focused on the improvement of the available services.

Sustainability

Knowledge of spaces and materials, as well as in-depth design competence, allows us to develop sustainable solutions that include the combination of the most performing products, on the basis of our clients' objectives.
