PVD FINISH - PHYSICAL VAPOR DEPOSITION

Available PVD from January 2026 only for Inox316 selected items of Time 2020 Maxi.

GO

Oyster Gold

GM

Metal Gun

PVD finishing: invisible technology, beauty that remains. Behind the discreet elegance of a perfectly finished surface, there is often a technology that works in silence. This is the case with PVD finishing - an acronym for Physical Vapor Deposition - an avant-garde process that allows a very thin layer of metal to be deposited on a surface, making it resistant, durable and precious. For Bongio, a choice of completeness of range, in order to satisfy all market requirements. Among the most refined PVD finishes are two tones that evoke different but equally sophisticated worlds: Oyster Gold and Metal Gun.

SWITCH20

NEME

Nero Opaco + Verde
Matt Black + Green

NERS

Nero Opaco + Rosso
Matt Black + Red

NENE

Nero Opaco + Nero
Matt Black + Black

Materials used are sustainable, non-toxic, healthy and durable. They don't oxidize or discolor over time. The white bronze treatment recovers the ancient production techniques of electroplated electrolytic deposition, 100% ecofriendly.

* Available only for Tools, Time2020 collections and stainless steel showers.

** Leaving finishes

Painted

L1 - SUNFLOWER (GLOSS)

Glossy ochre yellow emerges as a vibrant and enveloping shade, capable of bringing light and vitality to any space. This color, rich in nuances ranging from sun yellow to a warm and earthy ochre, acts as a bridge between the energy of nature and the essentiality of contemporary urban design.

L2 - FOREST (GLOSS)

The use of this glossy green shade in finishes, coverings, and accessories helps create relaxing atmospheres, ideal for the intimate space of the bathroom. Moreover, this green pairs well with a wide range of materials and colors, from wood to metal, from neutral tones to vibrant colors, thus offering endless possibilities for customization.

L3 - CHERRY (GLOSS)

Its depth, elegance, and refinement make it perfect for those who love a sophisticated and timeless style. This color offers a vibrant and bold touch, ideal for those who wish to express their personality in a more energetic and contemporary way.

L4 - LIGHT WATER (GLOSS)

The light blue tones, reminiscent of the sky and light water, can evoke a sense of a calm and dreamlike atmosphere, typical of artists who became famous for this very characteristic, such as Magritte. Magritte was renowned for his use of contrast between reality and the irrational, so a tribute to him might include familiar objects arranged in unusual ways, inviting the viewer to question their perception of the world.

L5 - MOKA GREY (GLOSS)

Moka Grey stands out for its ability to adapt to different furnishing styles, making it ideal for spaces like the bathroom, where a balance between beauty and practicality is often needed. This elegant and modern color lends a sophisticated and contemporary atmosphere, while at the same time maintaining a touch of warmth and welcome.

HV - LIGHT GOLD

An elegant combination of refinement and versatility. We have worked with passion to preserve the basic characteristics of gold, giving the product luminous and iridescent tones that are unique to the metal. Perfect for those who wish to enhance their spaces with style and class, this finish brings a touch of light and color that adapts to any environment. Choose Light Gold and be captivated by its timeless beauty, an alternative to the many offerings on the market, responding in technical and design terms to the contemporary way of living.

B1 - DARK GOLD

A highly resistant finish thanks to an innovative pigmentation system. It maintains a precious feel that accentuates the refinement of the products to which it is applied. It lends a touch of prestige in any context.

B2 - COPPER

A highly resistant finish thanks to an innovative pigmentation system. A warm and natural color, rich with coppery micro-nuances, this painted finish is versatile and adapts to a variety of furnishing styles.

B3 - GRAFITE

A highly resistant finish thanks to an innovative pigmentation system. An intense shade with an elegant and sophisticated look, it recalls the micaceous tones of iron. It can be used in minimalist spaces or to add a contemporary element to more traditional settings.

B4 - BLU OLTREMARE

A finish that seems to emerge from the depths of the ocean. Intense and enveloping, it conveys harmony and balance. The best choice for those who follow the new trends in the Wellness and kitchen worlds.

LG - LAGUNA

A relaxing finish inspired by maritime landscapes. It is a fresh color that evokes a sense of peace and tranquility.

WM - BALENA

This is a finish in matte thick powder paint. Ideal for giving modern series a deliberately 80s flavor for vintage and eclectic combinations.

RM - ROUILLE

This is a finish made in matte thick powder paint. Ideal for giving modern series a deliberately 80s flavor for vintage and eclectic combinations.

NE - MATT BLACK

Matt black tonality finishing obtained by powder. This finish is made with manual treatments and may therefore display colours variations due to the particular craftsmanship.

BI - MATT WHITE

Matt white tonality finishing obtained by powder.

SB-LI-SS-RS**(STRAWBERRY / LIME / SUPERSKY / F1 RED)**

This finishes are made in gloss paint, ideal for modern series.

FA - OLD IRON

Galvanic finish obtained by the deposit of different metallic finish, one over the other, plus a manual brushing and a final application of a mat varnish to maintain the old 'effect' during the time. This finish it is the best for the classic and modern collections. This finish is made with manual treatments and may therefore display colours variations due to the particular craftsmanship.

TT - TUSCANY BRONZE

Galvanic finish obtained through more phases, from a manual brushing to a particular polishing. Using a special glossy cream, we obtain the effect of an old finish.

This finish is made with manual treatments and may therefore display colours variations due to the particular craftsmanship.

AV - AGAVE

Soft-touch matt finish with changing shades from yellow-gold to cocoa-brass-color. This new bronze finish it is ideal for modern collections too.

GE - GELSO

Clear finish that enhances the design of taps, mixers and shower heads. With its light color, it is the perfect match for any type of bathroom furniture.

AU - AURORA

Our take on the horizon at dawn. This finish brings character to the mood of bathrooms and kitchens, adding a precious touch to enhance the setting.

DS - DESERT

Finish inspired by the wide-ranging shades of desert sands. A fresh take on an indomitable charm. Suitable in both large and more intimate settings.

EO - EBANO

Dark, elegant, unalterable. This finish brings the warmth of nature to spaces dedicated to personal care.

HO - HORIZONT

An intense finish to enhance Bongio's bathroom and kitchen products with a shade inspired by the colors of the horizon.

MI - BRUMA

Slightly opaque finish with neutral shades to fit all spaces of contemporary living, both in residential and commercial spaces.

Io, Bongio.

Galvanics

C2 - ANTIQUED COPPER

A galvanic finish, obtained with a base of the new White Bronze finish and a subsequent pass in a precious rose gold bath (22 Kt.). This process gives the surface precious, iridescent rosy reflections and provides a semi-gloss, "lived-in" yet contemporary look, offering a new vision for the nuances of rose gold.

C3 - ANTIQUED GOLD

A galvanic finish, obtained with a base of the new White Bronze finish and a subsequent pass in a precious yellow gold bath (24 Kt.). This process gives the surface precious, iridescent golden reflections, providing a semi-gloss, "lived-in" yet contemporary look for the continuous development and performance of our gold finishes.

C4 - ANTIQUED IRON

A galvanic finish, obtained with a base of the new White Bronze finish and a subsequent pass in a black chrome bath. This finish gives the surface precious, burnished metallic reflections ranging from gray to blue with iridescent tones, providing a semi-gloss, "lived-in," and modern look.

AP - BRUSHED ROSE GOLD

A galvanic finish obtained by the manual brushing of the Rose Gold finish in electrolytic baths (22 kt rose gold). It contains a very small percentage of copper which confers its characteristic pinkish color. An ideal finish for product lines with a modern and contemporary style.

CP - BRUSHED BLACK CHROME

A galvanic finish obtained by the manual brushing of the black chrome finish. Ideal for modern product lines.

BB - WHITE BRONZE

A new surface treatment inspired by ancient production techniques revisited with a contemporary approach.  100% sustainable, in line with the highest standards and now suitable for our line of products. These processes employ non-toxic eco-compatible alloys to give products a semi-gloss, iridescent appearance with silvery reflections. Hence the White Bronze, a healthy and extremely resistant finish immune to oxidation and discoloration, compliant with limits imposed by international regulations for drinking water.

NI - POLISHED NICKEL

This finish is similar to chrome but with warmer shades. Initially, the surfaces are mirrored but over time they evolve to a shade similar to silver.

NS - BRUSHED NICKEL

It is a brushed finish of the polished version, not protected by paint and it evolves over time. It may recall stainless steel but with a warmer tone. Ideal used for both classic and modern series.

AS - BRUSHED STEEL

The brushed stainless steel combines the benefits of an extremely hygienic and strong object. 

PL - PLATINUM

Brushed chromed galvanic finish, obtained through a manual brushing, with the final effect of the brushed stainless steel.

CR - CHROME

It is the most required finish with a mirror surface. Our higher thickness of chrome grants higher resistance.

CN - BLACK CHROME

This finishing very similar to the Chrome but more cold. The surface are like mirror with floss similar to "unix stone".

OR - 24KT GOLD

Galvanic finish obtained by 24 kt gold electrolytic processing.

OP - 24KT BRUSHED GOLD

Galvanic finish obtained in 24 kt gold electrolytic bath with manual brushing. Suggested for modern collections.

OA - ROSE GOLD

Galvanic finish obtained by 22 kt gold electrolytic processing. That contain a smallest quantity of copper that gives the characteristic rosed color, ideal finish for classic and modern series.

ON - NATURAL BRASS

Natural glossy finish of the real brass, deliberately not protected by paint to give a worn and antique look. Initially, the surfaces are shiny and homogeneous but in contact with the air, water&light, the finish evolves remaining shinier in the points of greatest contact while the metal becomes brown in the areas of least contact.

OS - BRUSHED BRASS

It is a brushed variant of the natural brass, it evolves over time and is suitable for use in environments with a strong material impact.

BU - TUMBLED BRASS

Raw variant with a semi-hammered effect of the natural brass finish and as such evolves over time in the same way of the natural brass.

Collections

Satin

BM - MATT BRONZE

Soft-touch matt finish with changing shades from yellow-gold to cocoa-brass-color. This new bronze finish it is ideal for modern collections too.

NM - MATT BLACK CHROME

Soft-touch Anthracite matt finish with brilliant reflections, moving from petrol-green to deep-dark-blue. A brand new very resistant finish, perfect in all kind of bathrooms.

PVD - Physical Vapor Deposition

GO - OYSTER GOLD

A warm and very light colour, inspired by the delicacy of mother-of-pearl and the golden light of morning. It has the charm of a barely noticeable gold, never excessive, always luminous. It is perfect for those who love refined details and a balance between modernity and classicism.

GM - METAL GUN

A deeper shade, tending towards burnished, with elegant and contemporary metallic undertones. It has the decisive character of carefully worked steel, but is surprisingly soft to the eye. A choice that communicates solidity and style without sacrificing discretion.

13	Satin black chrome*	NM*	☆	DELICATE	INSIDE	Neutral soap, warm water, soft cloth.	

NOTES GENERALS

For correct maintenance of the finishes, it is recommended to avoid the deposit, on the surfaces, of aggressive products, such as acids, chemical products and abrasive substances; as well as all substances that may prove corrosive over time. • It is also advisable to always rinse the surfaces with plenty of water and dry at the end of cleaning. • In terms of guarantee and following correct maintenance/cleaning, our finishes are also recommended in public/common environments - the only ones disconsiliated are those marked with * (asterisk). • Pos.7, PVD made on an AS basis: PVD has greater resistance to scratches, but is not suitable for installation in saline environments and for contact with floures.
