Subject: Important Notice: Commercial Terms Update and Price Adjustment

Dear Clients,

The current macroeconomic situation—characterized by persistent tensions in national and international logistics routes, alongside continuous cost increases for energy, structural metals, wood, technical fabrics, and assembly hardware—is exerting strong pressure on our entire manufacturing process and production costs.

Fully aware of the challenges facing our sector, during the current season we made every effort to absorb these extra costs internally, avoiding any adjustments to our price lists in order to protect and support your business.

However, the ongoing nature of these dynamics compels us, regretfully, to adjust our current commercial terms. Therefore, starting October 1, 2026, a slight 8% adjustment will be applied to the price lists currently in effect.

We would like to clarify that:

- **Current orders and contracts:** All orders already confirmed or agreed upon prior to this date will retain their agreed-upon terms unchanged.
- **Future updates:** The new 2027 price list will fully incorporate these adjustments and will be available, as usual, by the end of the year.

We remain at your complete disposal for any questions or further details regarding this communication.

Thank you for your continued trust and valued partnership.

Best regards,

Crema Outdoor S.r.l.
