Glamour Collection is the new and elegant total look to enrich our products with charm. A collection that comes from Italian craftsmanship and comes to life thanks to a captivating mixture of soft and sinuous shapes, high-performance materials and cutting-edge technology.

Cristiano Mino

Glamour Collection

Timeless elegance

Glamour Collection is the utmost expression of Italian craftsmanship: a perfect union between fine materials and timeless elegance.

This collection brings the Nordic wellness tradition back to life, to making it modern thanks to **cutting-edge technology** and **functional design** with soft and sinuous shapes.

With its **highly modular elements**, Glamour Collection blends perfectly in any home or work environment, fulfilling any need in terms of space.

Renewable materials and completely natural types of wood are two fundamental elements of our idea of **environmentally sustainable design**.

Glamour Sauna

The charm of Nordic tradition

Discover more on Glamour Sauna

GLAMOUR SAUNA

Glamour Sauna

A JOURNEY TO THE PAST

Glamour Sauna **takes the charm of Nordic culture into a modern context**, innovating traditional atmospheres through functional and unique design.

The careful selection of **fine materials** contributes to making this product a symbol of the elegance and charm of Italian craftsmanship.

Also available in the Soft Sauna mode, characterised by a mild heat, for a gentle and embracing wellness experience.

A special environment for Wellness

Attention to details, essential appearance, colours, fragrances and natural-inspired materials that are soft to the touch make the sauna experience even more remarkable.

BENEFITS

Glamour Sauna offers the intense heat Finnish sauna, with a temperature of 90-100°C and humidity rate of 10-20%, which make it ideal to relax muscles, train the cardiocirculatory system, and speed up the drainage of metabolic waste. The Soft Sauna version, operating at 50-60°C and with a humidity rate of 40-60%, strengthens the upper airways.

COLOURS AND FRAGRANCES

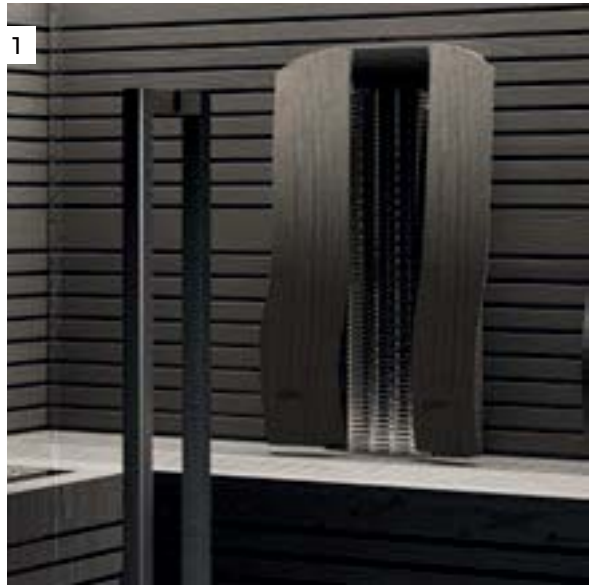

The properties of the different wood types lend Glamour Sauna extraordinary colours and fragrances. From the black-waxed fir with an evocative smoky effect with natural black, charcoal and dark brown hues that recall the traditional Savusauna; to the Canadian red cedar and its disinfectant properties; and until the softness of linden, which recreates a pure and powdery atmosphere.

LIGHTING

An embracing beam of indirect light that brightens the interior in wood, enhancing its purity. A diffused blaze that evokes the original lighting of saunas, when sun rays shone through the small windows nested in the walls.

COMBI OPTION

The “Combi” option includes and combines, in one environment, the traditional oven typical of the Finnish sauna and the infra-red lamps, which warm up the body through an ergonomic seat.

1- The "Combi" option combines the oven of the Finnish sauna and the infra-red lamps.

2- Oven with Glamour Sauna pressure-activated safety system.

3- Glamour Sauna in Savublack Fir.

4- Glamour Sauna with Vision front.

Functional design

The design by Starpool is the right balance between beauty and function. The resulting environment then fulfils not just the appearance, but also meets specific requirements both in terms of space and sustainability.

1. DOOR

Comfort, convenience and accessibility thanks to the door with low handle, now increased in width to 87 cm.

2. MODULARITY

The cabin features self-standing modular walls which make masonry works unnecessary. It is a finished product inclusive of the internal cladding.

3. SAFETY AND MONITORING

The oven is separated from the wooden structure thanks to a wall in Ecostone or ribbed glass, for total protection from the heat. The alarm button inside the cabin stops all the functions and cuts the power supply, sending an alarm signal to the monitoring device for rapid intervention in case of emergency.

4. BENCH

Flip top for easier and more accurate cleaning operations.

CONVENIENCE

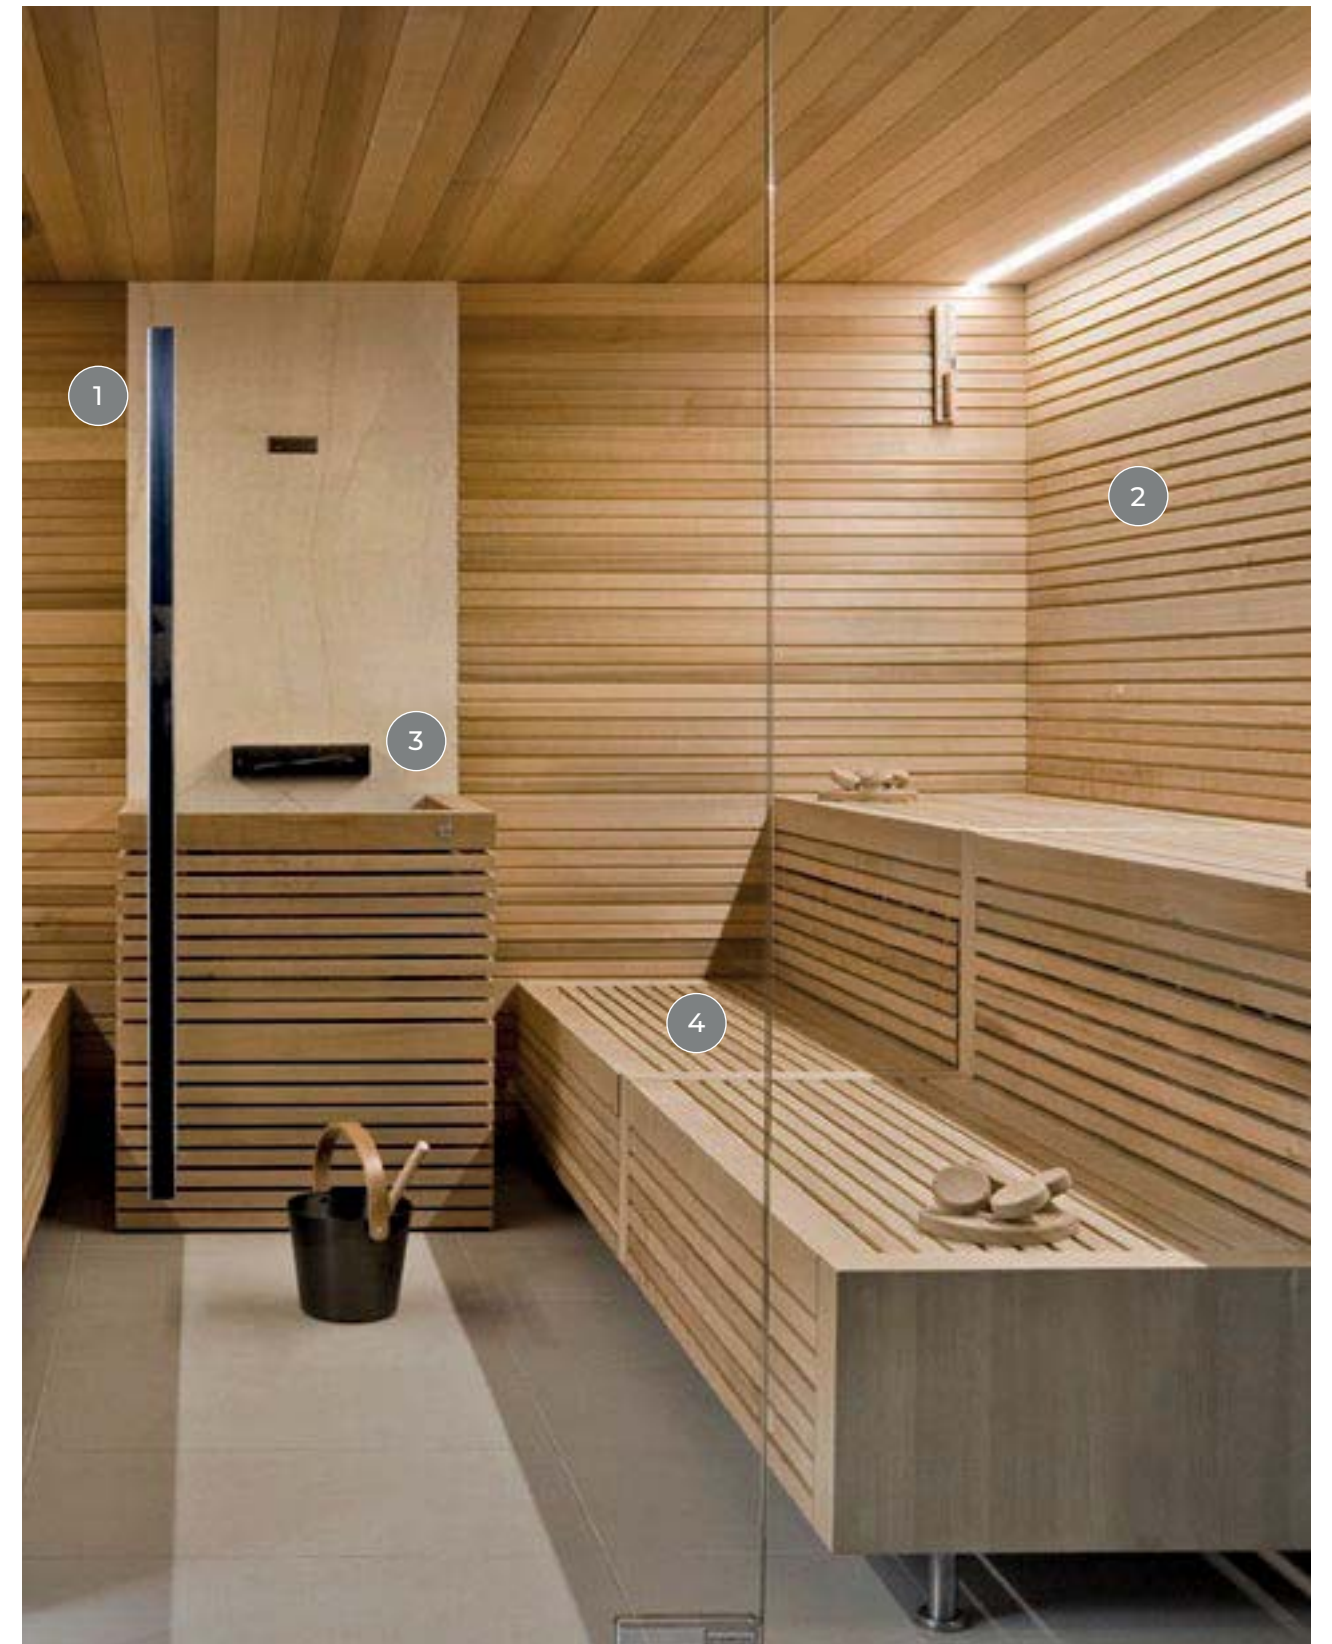

The installation is quick and safe and the product can be disassembled and assembled again elsewhere.

BE GREEN

The Green pack software for the **reduction of energy consumption** is a standard feature in Glamour Sauna.

It allows **power adjustment** when the set temperature is reached and features a **self-closing door**.

The **smart sensors** stop steam or heat production in case the door remains open for a prolonged time, sending an alarm signal to the control device.

Glamour Steam Room

Rituals brought back to life in a new form

Discover more on Glamour Steam Room

GLAMOUR STEAM ROOM

Glamour Steam Room

A STEAM EMBRACE

Soft and sinuous lines outline the shapes of Glamour Steam Room, a steam bath that brings back the ancient wellness rituals with **elegance and charm**. An environment with a strong personality, where the flecked dome ceilings evoke **the typical light beams of the Arab hammams**.

The gold and silver enhance the functional elements of the Glamour Steam Room, and lends a **strong and distinctive style to the environment**.

A special environment for Wellness

A modular product, with its own internal cladding, designed to offer exclusive moments of regeneration and relaxation thanks to technology and high-quality performance.

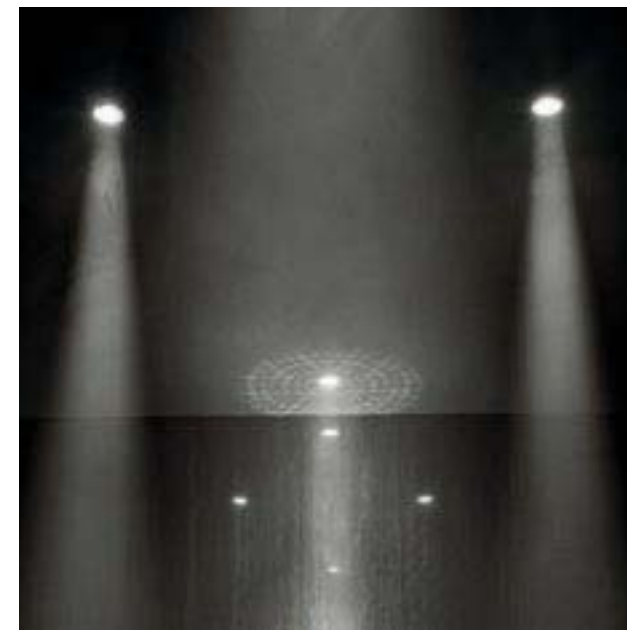

BENEFITS

Air, steam and scented fragrances combine and gently rest on the skin, making natural exfoliation easier and promoting the elimination of impurities. The temperature of 43/ 45°C and the humidity rate of 98% help to strengthen the upper airways.

FRAGRANCES

The essence of eucalyptus, mixed with the steam, is inhaled into the cabin and lends it a strong identity. This fragrance, thanks to its purifying, refreshing and decongestant properties, enhances the benefits of the entire experience.

LIGHTING

The dim lights and the domed ceiling flecked by small light beams characterise the Glamour Steam Room with an embracing atmosphere, accompanying guests in a semi-magical world that evokes ancient Arab hammams.

MUSIC

A music kit is available with the best spa music tracks selected by us at Starpool. The experience can also be enjoyed with your favourite music thanks to the MP3 device with USB and Bluetooth technology.

1

1- Steam inlet with patented technology Air Steam System.

2

2- Column, wall and bench leg in anodised aluminium.

3

3- Wall-mounted handshower and alarm button in Glamour Steam Room.

4

4- Glamour Steam Room with walls in ribbed glass and bench in Ecostone.

Functional design

The design by Starpool is the right balance between beauty and function. The resulting environment then fulfils not just the appearance, but also meets specific requirements both in terms of space and sustainability.

1. DOOR

Comfort, convenience and accessibility thanks to the door now increased in width to 87 cm.

2. NO GROUTING

Less than 1% of the cladding surface in glass or Ecostone is grouted, which makes Glamour Steam Room the product that offers the best guarantee of hygiene.

3. BENCH

The bench is suspended and removed from the wall, making cleaning operations easier. It is made in Ecostone, an antistatic and antibacterial material.

4. MODULARITY

The cabin features self-standing modular walls which make masonry works unnecessary. It is a finished product inclusive of the internal cladding.

5. STEAM INLET

The steam is inlet inside the cabin through an outlet in anodised aluminium which protects guests from direct contact with steam.

6. AIR STEAM SYSTEM PATENTED TECHNOLOGY

The exclusive patented technology Air Steam System produces a special mixture of steam, fresh air and fragrance, which ensures better air quality, as well as an even, no-layering steam diffusion.

7. SAFETY AND MONITORING

The Alarm system is equipped with a remote connection that ensures rapid intervention in case of emergency.

8. WALL HANDSHOWER

The number of handshowers increases proportionally to the size of the cabin. Handshowers are useful to freshen up and to facilitate cleaning operations.

CONVENIENCE

The installation is quick and safe. The product can be disassembled at any time and reassembled elsewhere.

BE GREEN

The Green pack software for the **reduction of energy consumption** is a standard feature in Glamour Steam Room.

It allows **power adjustment** when the set temperature is reached and features a **self-closing door**.

In addition, **smart sensors** stop heat production if the door remains open for a prolonged time, sending an alarm signal to the monitoring device.

Glamour Mediterranean Bath

A regenerating bath in name of uniqueness

Discover more on Glamour Mediterranean Bath

GLAMOUR MEDITERRANEAN BATH

Glamour Mediterranean Bath

GENTLE TEMPERATURES, UTMOST WELL-BEING

Glamour Mediterranean Bath is **inspired from the Roman laconicum**, featuring a **deep and embracing kind of heat** that is **radiated into the body**.

This extremely elegant environment can be **clad in stone or glass**, and ensures a completely beneficial experience. A sophisticated and cosy place that offers maximum comfort thanks to the milder temperatures than in the sauna and steam bath.

A special environment for Wellness

A product that represents the evolution of the ancient Roman Baths.

Thanks to cutting-edge technology and advanced performance,
this cabin offers a sensation of total heat immersion.

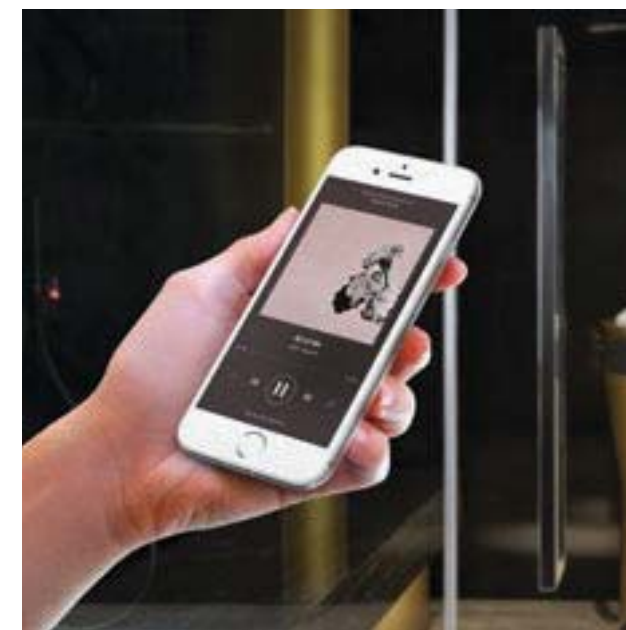

BENEFITS

A patented system that radiates heat from the walls, bringing the room temperature to 45-50°C with a humidity rate of 55-65%. This special radiant system favours skin elasticity, faster drainage of metabolic waste and sleep quality improvement.

FRAGRANCES

A special ceiling-mounted outlet releases a pleasant aroma on the hot stones of the oven, together with an intense red light. The result is an exciting mist that creates a warm cloud of vapour, diffusing a delicate lavender scent throughout the environment.

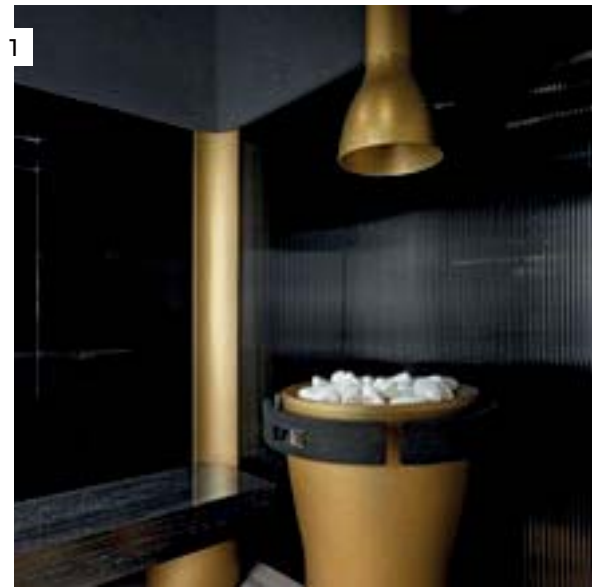

LIGHTING

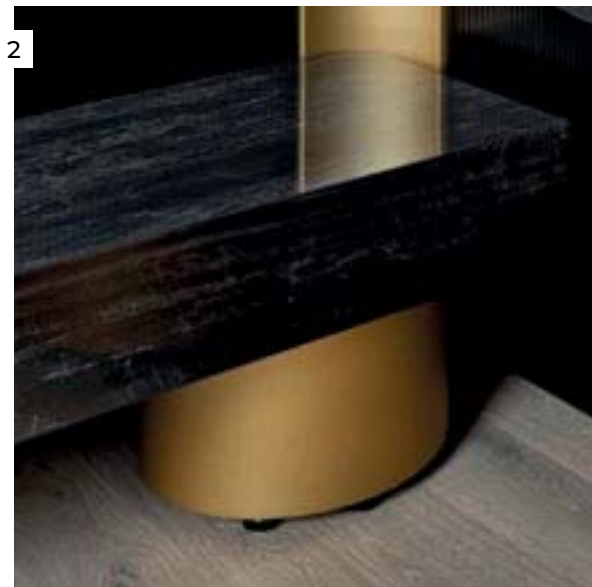

The ceiling is flecked by special dim white light beams, lending the environment an aura of exclusive privacy and natural lighting.

MUSIC

A music kit is available with the best spa music tracks selected by us at Starpool. The experience can also be enjoyed with your favourite music thanks to the MP3 device with USB and Bluetooth technology.

1- The ceiling-mounted outlet releases a water mist onto the hot oven stones.

2- The bench is suspended and detached from the wall, making cleaning operations easier.

3- The number of handshowers increases proportionally to the size of Glamour Mediterranean Bath.

4- Steam inlet, wall columns and bench legs in anodised aluminium.

Functional design

The design by Starpool is the right balance between beauty and function. The resulting environment then fulfils not just the appearance, but also meets specific requirements both in terms of space and sustainability.

1. DOOR

Comfort, convenience and accessibility thanks to the door with low handle, now increased in width To 87 cm.

2. NO GROUTING

Less than 1% of the glass or Ecostone cladding surface is grouted, which makes Glamour Mediterranean Bath the product that offers the best guarantee of hygiene.

3. BENCH

The bench is suspended and removed from the wall, making cleaning operations easier. It is made in Ecostone, an antistatic and antibacterial material.

4. MODULARITY

The cabin features self-standing modular walls which make masonry works unnecessary. It is a finished product inclusive of the internal cladding.

5. CUTTING-EDGE TECHNOLOGY

The exclusive patented system with radiating walls offers even and constant temperature. A special ceiling-mounted outlet releases a mist of scented water onto the oven stones, which slightly increases the humidity rate.

6. SAFETY AND MONITORING

The Alarm system is equipped with a remote connection that ensures rapid intervention in case of emergency.

7. WALL HANDSHOWERS

The number of handshowers increases proportionally to the size of the cabin. Handshowers are useful to freshen u and to facilitate cleaning operations.

CONVENIENCE

The installation is quick and safe. The product can be disassembled at any time and reassembled elsewhere.

BE GREEN

The Green pack software **for the reduction of energy consumption** is a standard feature in Glamour Steam Room. It enables **power adjustment** when the set temperature is reached and features a **self-closing door**. In addition, **smart sensors** stop the production of steam or heat if the door remains open for a prolonged time, sending an alarm signal to the monitoring device.

Glamour Ice Room

The pleasant thrill of wellness

Discover more on Glamour Room is Room

Glamour Ice Room

A BURST OF ENERGY

Glamour Ice Room offers the reinvigorating power of ice in an environment of **sophisticated and elegant lines**, where the ceiling reproduces the magic of a starry sky – for an unforgettable wellness experience.

A **basin containing finely crushed ice**, produced by a ceiling-mounted ice fall, creates the ideal kind of cold reaction after the exposure to intense heat.

A burst of energy enriched by **colour vibrations** to rebalance body temperature and make the most of the regenerating effect of the wellness experience.

A special environment for Wellness

A union of elements that make Glamour Ice Room a reinvigorating place, offering energy thanks to the contact with ice.

BENEFITS

The refrigerating Cool System spreads the cool air evenly inside the cabin, taking the temperature between 5°C and 15°C, ideal to bring body temperature back to its normal level.

ICE FALL

A basin clad in anodised aluminium contains finely crushed ice to massage on the body starting from the feet and moving upwards.

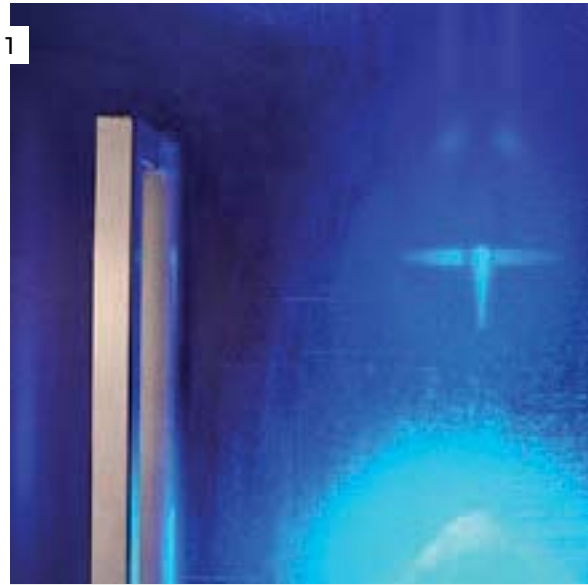

LIGHTING

The ceiling is flecked by small blue lights which create unexpected light reflections on the walls. The two lights inside the ceiling-mounted fall illuminate the ice, giving it special colour-changing shades.

MUSIC

A music kit is available with the best spa music tracks selected by us at Starpool. The experience can also be enjoyed with your favourite music thanks to the MP3 device with USB and Bluetooth technology.

1 - The ice fall inside Glamour Ice Room.

2 - Finely crushed ice inside the aluminium basin.

3- The bench is suspended and detached from the wall, making cleaning operations easier.

Functional design

The design by Starpool is the right balance between beauty and function. The resulting environment then fulfils not just the appearance, but also meets specific requirements both in terms of space and sustainability.

1. DOOR

Comfort, convenience and accessibility thanks to the door with low handle now increased to 87 cm in width.

2. NO GROUTING

Less than 1% of the cladding surface in glass or Ecostone is grouted, which makes Glamour Ice Room the product that offers the best guarantee of hygiene.

3. MODULARITY

The cabin features self-standing modular walls which make masonry works unnecessary. It is a finished product inclusive of the internal cladding.

4. ICE BASIN

The finely crushed ice inside the basin clad in anodised aluminium is ideal to cool off the skin.

5. SAFETY AND MONITORING

The Alarm system is equipped with a remote connection that ensures rapid intervention in case of emergency.

6. WALL HANDSHOWERS

The number of handshowers increases proportionally to the size of Glamour Ice Room. Handshowers are useful to freshen up and to facilitate cleaning operations.

7. BENCH

The bench is suspended and removed from the wall, making cleaning operations easier. It is made in Ecostone, an antistatic and antibacterial material.

COOL SYSTEM TECHNOLOGY

With Glamour Ice Room, Cool System is a standard feature, developed in collaboration with cooling experts, that brings room temperature from 5°C to 15°C.

CONVENIENCE

The installation is quick and safe. The product can be disassembled at any time and reassembled elsewhere.

BE GREEN

The Green Pack software for the reduction of energy consumption is a standard feature in Glamour Steam Room. It enables power adjustment when the set temperature is reached and features a self-closing door. In addition, **smart sensors** stop the cooling technology – thanks to the **energy-efficient** software – in case the door remains open for a prolonged time, through an alarm signal to the control device.

Glamour Shower

The pleasure of daily well-being

Discover more on Glamour Shower

Glamour Shower

TIMELESS ELEGANCE AND WELLNESS

Glamour Shower expresses the **perfect balance between timeless charm and excellent craftsmanship**. This shower combines the finest materials and details, turning the environment in a space of pure relaxation.

The sophisticated design is inspired by the Nordic wellness culture, and reinterprets it with cutting-edge technologies for a regenerating and embracing experience. The **high modularity** makes Glamour Shower perfect for any environment, and its glamorous details give it an **exclusive touch**.

A wellness experience that embraces body and mind in a timeless and elegant environment.

Complete your wellness

A unique product that encloses the pleasant sensations of water and lends a new personality to the surrounding space.

BENEFITS

Glamour Shower promotes total physical well-being thanks to perfect regulation of the jet temperature and intensity. The alternation of heat and cool promotes blood flow, relaxes muscles and regenerates skin, offering a unique and regenerating sensory experience.

SHOWERHEAD

The showerhead of Glamour Shower combines appearance and innovation for an experience of total well-being.

Designed to produce an even, enveloping jet, it ensured a delicate water massage that brings relaxation and regeneration, adjusting to the different needs in terms of comfort and relaxation.

WATER FITTINGS

An only solution that includes mixer to control water temperature and diverter to activate the handshower or shower head. All the fittings are realised according to our exclusive design and ergonomic shapes ensuring better grip.

STYLE

The design of Glamour Shower embodies charm, tradition and timeless elegance. The skilful Italian craftsmanship is visible in the sophisticated lines and fine materials, which create an element with strong aesthetic impact. The unique artistic aesthetics and the perfect combination between function and style create sophisticated atmospheres, enhancing every environment with timeless elegance.

*The
sustainable
spa*

Smart Technology

Sustainable products and technologically performing systems contribute to defining the quality standard of each activity.

Control Unit, Eco Spa Technology and Emostyle Technology are the software solutions that we propose to reduce the **energy consumption** of our products, as well as improve and automate their functions.

Technology in the service of our clients to increase connectivity to a computer network which is more and more sophisticated and, at the same time, user- friendly.

The remote management of our every realisation, ranging from the room temperature parameters to the scheduling of the switching on and off of the cabin, **as well as predictive maintenance, ensure constant consumption monitoring and optimization of operating costs.**

To make wellness more and more accessible and smart.

Discover more on our technological solutions and innovations

GREEN PACK

This software allows to **reduce energy consumption** thanks to **smart sensors** that stop the steam or heat production in case the door remains open for a prolonged time, through an alarm signal to the control device. In addition, it features a **power adjustment** function when the set temperature is reached, and a **self-closing door**.

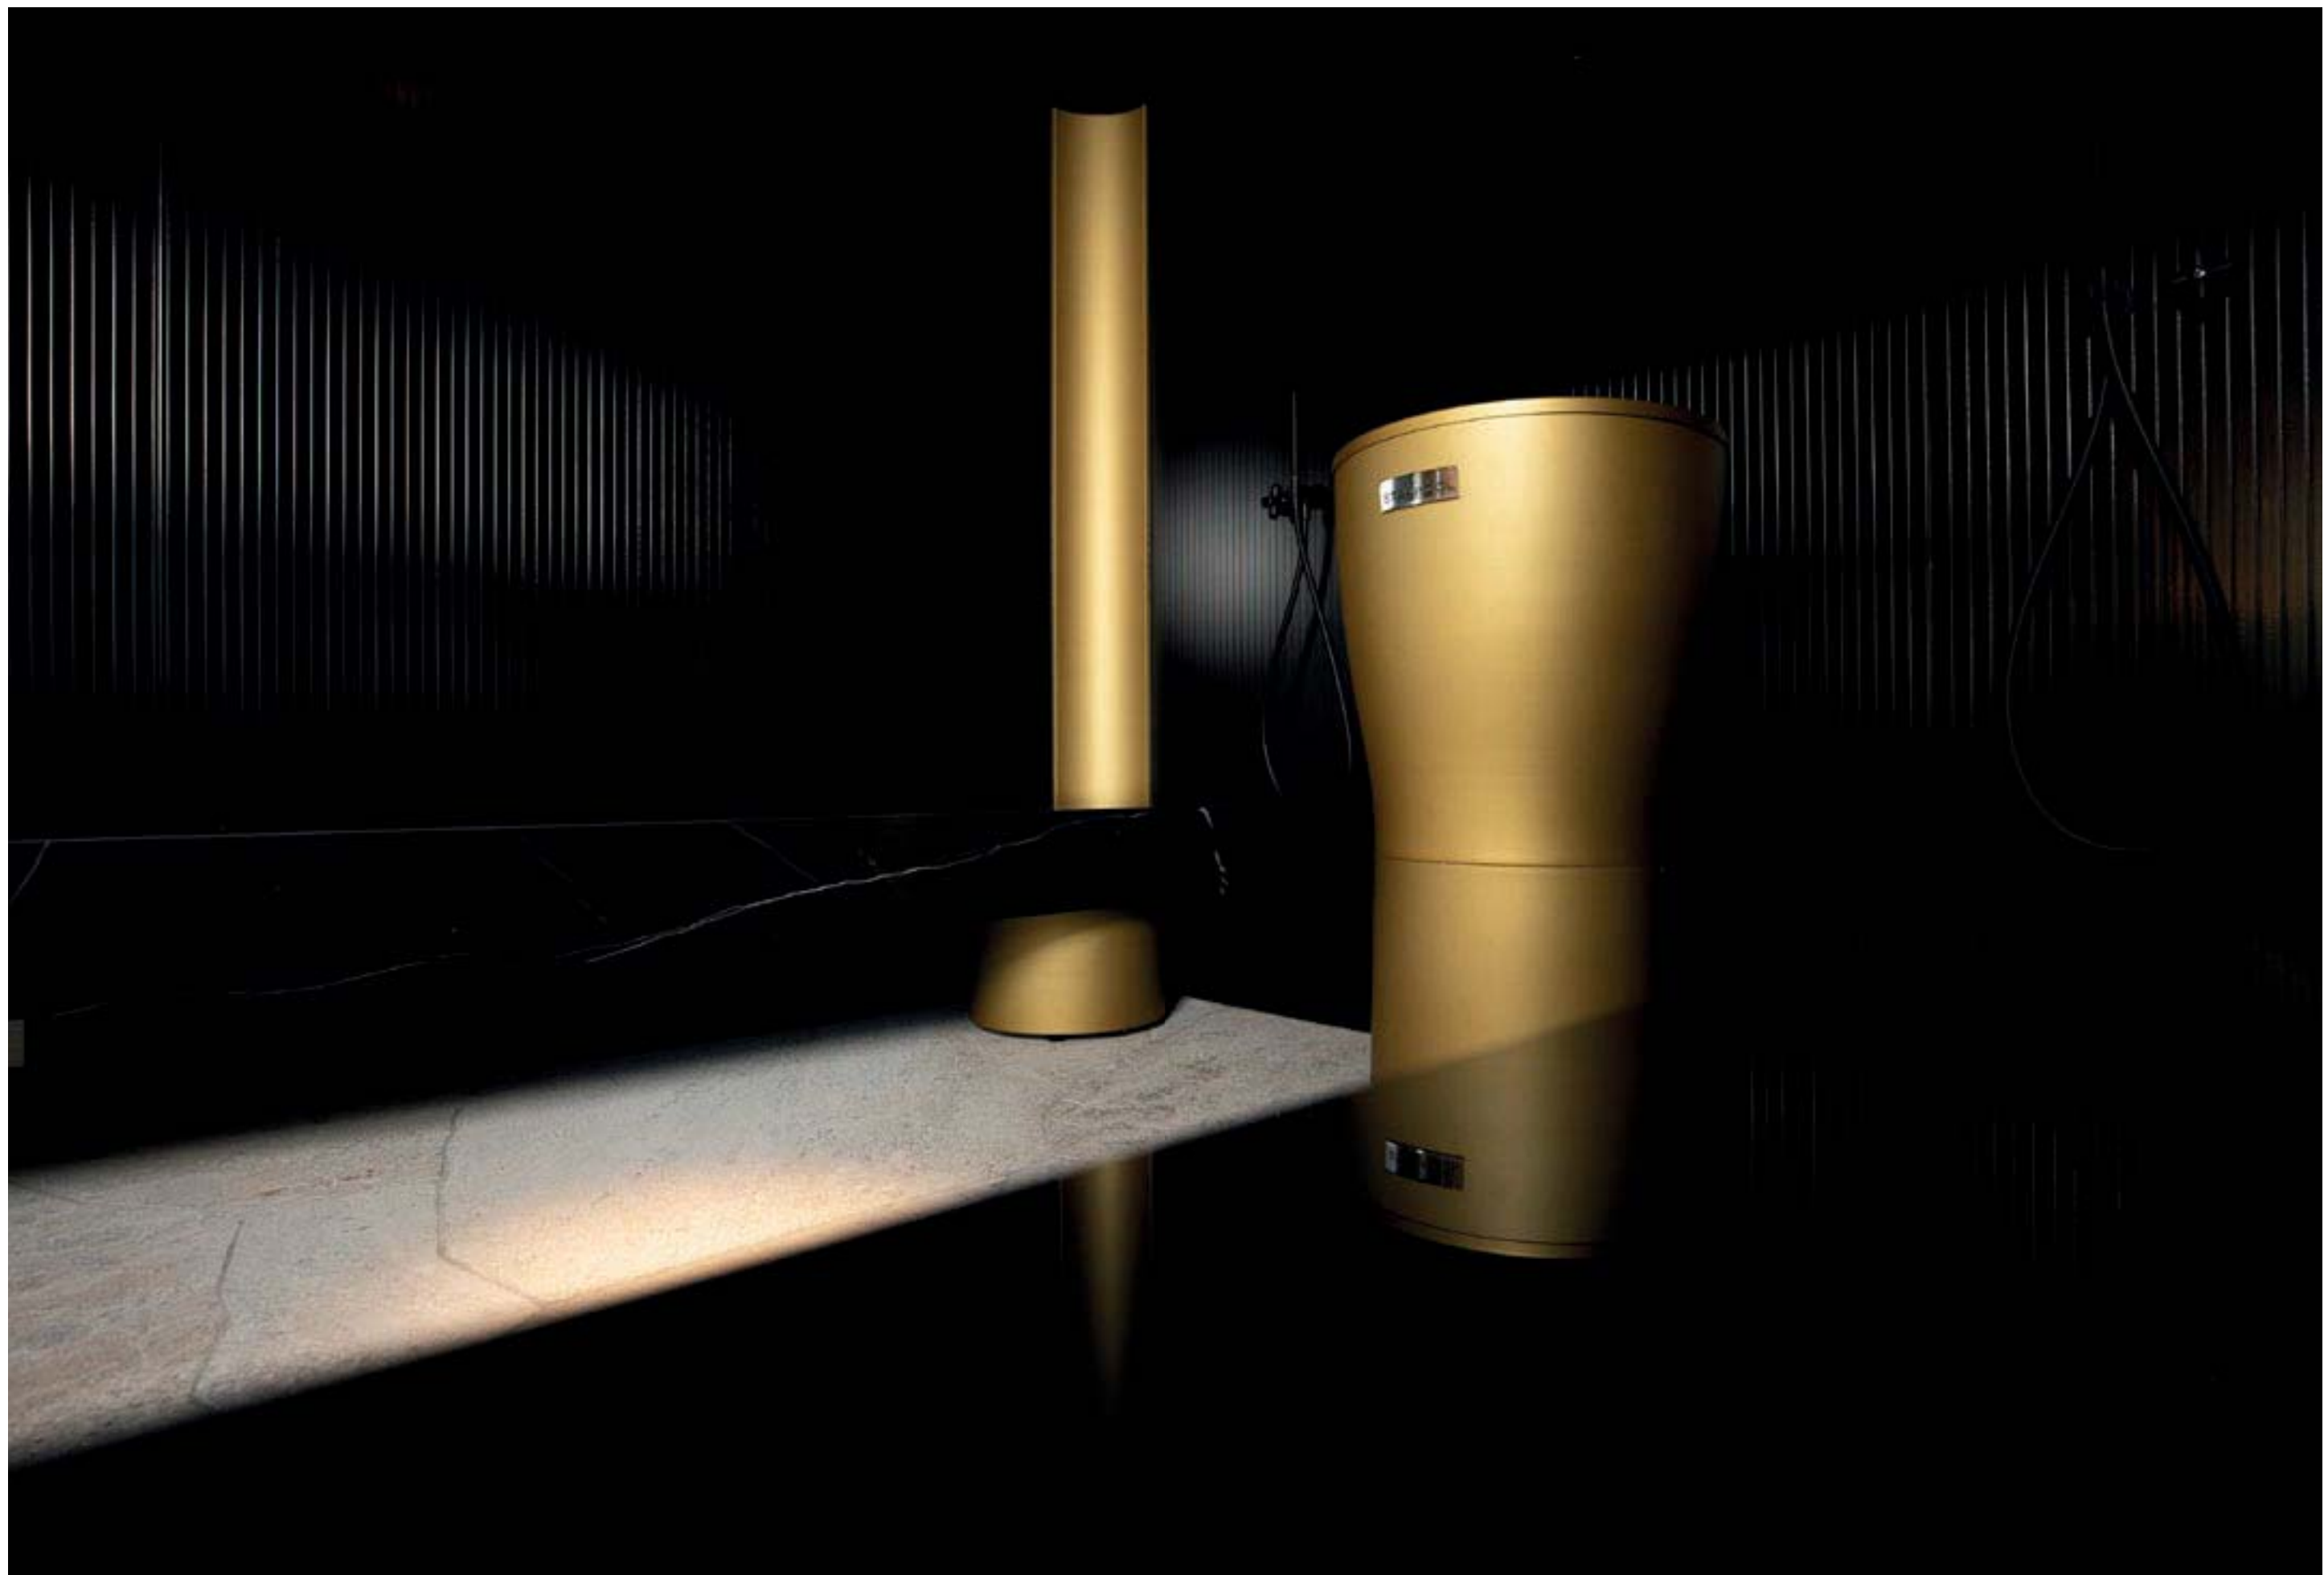

SIM 4.0

It is a subscription software that allows for the **remote management** of the spa. Thanks to a dashboard, Sim 4.0 allows to view the main **parameters of the equipment**: consumption, spa entries and anomalies. As an extra service, thanks to our **Business Intelligence**, it is also possible to receive a **three-monthly report** on the products' performance to make the spa management easier. A **remote support service** is also available upon request to reduce the intervention time and costs.

DEEP CLEAN

The software generates **programmable cycles** of thermal shock to achieve **over 95% disinfection**. This process involves a forced temperature increase in the equipment, thus eliminating impurities and pathogens.
